

Manuel Menéndez

Software developer living in Barcelona. More than 5 years of experience building and delivering backend systems, with a strong focus on teamwork, code quality. Good background in functional programming. Able to take ownership of features and deliver end-to-end solutions. Capable of contributing to projects at any stage, whether building from scratch or joining ongoing development. Experience with relational and non-relational databases, developing, testing and deploying code. Always willing to learn.

Excellent personal skills, empathy and a compatible team player. Passionate about Elixir/OTP and all kinds of topics related to backend and database engineering. Continuous focus on developing my analytical skills and problem solving capacities.

EXPERIENCE

Kantox, Spain — Software Engineer

ABR 2022 - PRESENT

Working on a strategic project that sends hedge recommendations based on clients hedging strategies. Collaborating with cross-functional teams like frontend, product, cloud, QA and management. Working with Elixir/Phoenix, ES/CQRS, REST APIs, LiveView, Gherkin/Cucumber for acceptance tests, PostgreSQL, ETS, InfluxDB, RabbitMQ, OpenTelemetry, Grafana, AWS.

Zubale, USA — Software Engineer

MAY 2021 - ABR 2022

Helping enhancing and scaling the engineering strategy. Working in a very dynamic position by taking care of different microservices using Elixir/OTP, Phoenix, Apache Kafka, Elasticsearch. PostgreSQL, MongoDB, Redis and GraphQL. Integrating external APIs and services with the platform. Improving DB performance, designing systems and more.

Joven Club Central (National Development Team), Cuba — Full-stack Developer

MAY 2017 - MAY 2021

Development of different admin frontend web apps (Vue/React), Android apps (Java/Kotlin), and REST APIs (Elixir/Phoenix, Node.js). Capturing business rules from the clients and translating it into software that solves their needs.

SKILLS

Elixir, OTP, Phoenix, LiveView

ES/CQRS

Docker, Github Actions

AWS, Grafana

HAProxy, Keepalive, Ansible

RabbitMQ, Kafka, Redis

GNU/Linux

Elasticsearch

postgreSQL, MySQL, SQLite,
MongoDB

Human relationships,
ownership, empathy, initiative
to hangout with the team

Passion for learning

Freelancer, Havana — Full Stack Developer

MAY 2017 - PRESENT

Worked in projects for different clients having these responsibilities:

- Develop GraphQL APIs using Elixir/Phoenix (Absinthe) and REST APIs using Express.js (Node.js)
- Web development using React.js and Vue.js
- Develop GIS applications using Folium (Python), Vue and Leaflet.js

LANGUAGES

Spanish (Native)

English (IELTS B2)

French (DEL F A2)

Portuguese

EDUCATION

Technological University of Havana, Havana — Bsc. Computer Science Engineering

SEPTEMBER 2011 - FEBRUARY 2017

CERTIFICATIONS

Virtalus LLC, Los Angeles, CA — Virtalus Certified Cloud Engineer
